DETAILED ACTION

1. The Amendment filed on 09/02/2004 has been entered. Claims 1-21 are pending in this Office action.

Response to Arguments

2. Applicant's arguments with respect to claims 1-3, 5-10, 13-14, 15-17 and 19-21 have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-11 and 13-19 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter, which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention.

The essential material "integration interval and noncoherent passes", is incorporated by reference, US Patent 6,718,170 B1 "Dynamic Allocation Of Microprocessor Resources In A Wireless Communication Device". The claims are

rejected for lack of description of the essential material in the US Patent 6,718,170 B1.

The cited description does not reasonably convey to a person of average skill in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. See MPEP 608.01(p), I. Incorporation by Reference, A. Review of Applications Which Are to Issue As Patents.

4. Claims 12, 20-21 are rejected for being dependent upon rejected claims.
